

## OPUS Options: Extras

### BPW WS3000 Stabilising Hitch Coupling

The BPW Winterhoff WS3000 Stabilising Hitch Coupling is a useful addition to any OPUS. It makes towing the OPUS even easier than the standard hitch coupling, if that is even possible. The Stabilising Hitch Coupling is designed to dampen snaking movement that can occur when towing and the pitching of the car/trailer combination. The WS3000 is really simple to use utilising a single lever system for all functions. If you are looking for the easiest towing experience possible then the addition of a WS3000 Stabilising Hitch Coupling is a great addition to your OPUS.

### The Saracen WS3000 Hitch Lock

If you have decided upon upgrading your hitch coupling to the WS3000 Stabilising Hitch Coupling then you might want to add an extra level of security by including a Saracen WH Hitch Lock. The hitch lock is secure, easy to use, fast to fit and includes an integrated high security lock. An additional bonus to the Saracen WH Hitch Lock is that it is insurance approved, meaning that by using this every time you are now towing you will benefit from reduced insurance premiums.

### Nemesis Ultra Wheel Lock

The Nemesis Ultra Wheel Lock is one of the most secure wheel locks money can buy. It is the only wheel lock to ever be Thatcham Category 3 approved, meaning that it has stood up to one of the most rigorous tests possible, and even withstood the use of an angle grinder. This wheel lock from Full stop Security's Thatcham Approved range is Designed and Developed, has a patented design, is ultra lightweight, slim line and easy to use. It is suitable for both Steel and Alloy wheels and gets you a guaranteed 20% discount on insurance premiums from Safe Guard Insurance.

### Mains Extension Lead - 10 Metre

Running your OPUS electrics from 240v Mains is by far the most effective. This 10 metre mains lead in outdoor orange cable is perfect for connecting your OPUS' electrics to any 240 volt site hookup. The mains lead consists of site mains plug, caravan mains socket and 10 metres of 3 core mains cable rated at 25amp @ 240v AC.

### 12 Volt 110 Ah Leisure Battery

A leisure battery is a really useful addition to your OPUS. Leisure batteries are specifically manufactured for the demands of constant low-current drain use as opposed to the short bursts of high power given by a car battery. This is what sets a leisure battery apart from a standard large battery like a car battery. As we know OPUS explorers venture all over the place, and we understand that sometimes mains power is not going to be available. So when you are well of the beaten track it be pretty useful to maintain lighting, heating and refrigeration, and that is where a leisure battery becomes vital. Because eating gone of food and drinking warm beer in the dark is far from ideal.

### Enduro Remote Control Motor Mover

We all know OPUS is light weight, but it can still be quite tricky to move, especially if you are alone, on rough terrain or need to move up a slope. The best solution for making manoeuvring and hitching a breeze is the addition of a remote control motor mover. Moving your OPUS then couldn't be easier, simply engage the motors onto the tyres using a crank lever, and you can then move your OPUS around via remote control. Enduro is one of the biggest names in the Motor Mover Market and is controlled by Quattro Intelligent Electronics. The Enduro motor mover uses 12v motors (leisure battery required) to move your OPUS. It is capable of rotating 360° and can move an OPUS up a 1-in-4 slope. The price includes factory fitting of the Enduro Remote Motor Mover to your OPUS.

### Water and Waste Carriers

These roll-along water and waste tanks are a really useful addition to your OPUS. The 23 litre capacity of the water carrier gives you the ability to store enough water to wash your hands, brush your teeth and rinse your salad when running fresh water is not so easy to come by. All the grey water wasted is then stored in another roll-along tank for easy disposal. The OPUS is pre fitted with external storage space for one of each of these roll-along tanks making them easy to store and transport.

### OPUS Alloy Roof Bars

One of the best features of OPUS is its load carrying ability. The OPUS lid is fitted with universal roof bar fitting brackets. This set of two high quality lockable roof bars made from lightweight aluminium with smooth end moulded caps.

### Carrier

Bike Carrier  
Kayak Carrier

Taking your OPUS on a mountain biking adventure? Fancy a paddle down the river? With these carriers you can take your mountain bikes or kayaks with you when you go away in your OPUS. The OPUS is capable of taking up to two carrier. Made from lightweight aluminium the Bike and Kayak Carriers are specially designed to allow secure fixing of your chosen item to your roof bars. Roof bars are required for the fixing of these carriers.

### Corner Steady Feet

If you are planning to spend the night on soft ground you may find that your corner steady legs can dig into the ground. These clip on plastic corner steady feet spread the weight over a greater surface area, meaning your corner steady legs are a lot less likely to sink into the ground.
